ABOUT US

Andys Lawn Seed does not contain any fillers/coating in our mixture, providing top quality seeds with no added weight making it simple for the consumer. Andys Premium all purpose blend contains 20% Turf Type Perennial Ryegrass, 20% Kentucky Bluegrass and 60% Creeping Red Fescue Which Is ideal for both over-seeding and starting a new lawn.

Most of our seed comes right from the heart of the peace region and is inspected and cleaned to exceed Canada's No. 1 Lawn Mixture standards making sure you, the customer get top quality seed for your projects.

RESULTS

BEFORE

AFTER

- Creeping Red Fescue: Creates a thick durable drought resistant lawn.
- Perennial Ryegrass: Germinates The Quickest, Usually Within 7-14 Days
- Kentucky Bluegrass: Known for its beautiful colour, Coming Back Year After Year Performing Well In The Cool Seasons

DIRECTIONS

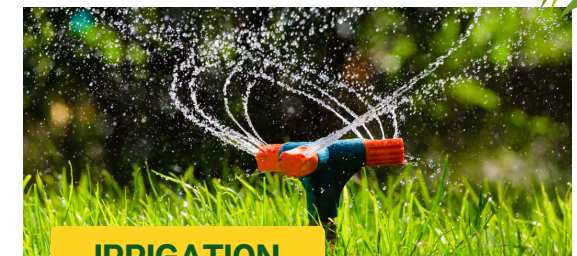

PREPAIRING

For new lawns, rake up dirt to about 3cm deep and clear any weeds and debris. When over-seeding cut grass to about 1.5in, also making sure it is free of weed and debris.

SEEDING

For new lawns, spread the seed evenly at about 1lb per 400 sq ft. For over-seeding spread the seed at about 1lb per 1000 sq feet.

IRRIGATION

Maintain irrigation to ensure that your lawn receives the right amount of water. This is very important to help maintain the health and beauty of your lawn.
